These are classified into four major groups: sedatives and tranquilizers, opiate narcotics, stimulants and hallucinogens. They drinkers begin with small doses, but many of them soon start consuming large doses and become addicts. It is not desirable as it may cause a mental breakdown. Many people take alcohol for stimulation. It is one of the products of the distillation of fermented grains, fruit juices and starches with the help of yeast enzymes. A smoker makes the person nearby person's passive smokers through inhaling smoke released by him. Classification of Drugs 9 7. The cigarette is cut tobacco wrapped in paper. 17. 12. 5. Alter thoughts, feeling, and perceptions. 4. 18 End of Project Thank you! (i) Stimulates conduction of nerve impulses. 10 Combinations of Drugs and Alcohol Some addicts use mixtures of drugs to have immediate 'kick' or 'charge'. Abadinsky, Drug Abuse (1989); H. Curiosity: Frequent references to drugs by public media create curiosity for having a personal experience of the drugs. Modes of Use: Tobacco is used for smoking, chewing and snuffing. 16 What happens when Alcohol is consumed? 9 Classification of Drugs There are a large number of drugs on which people become dependent. 2 Certificate This is to certify that this "Biology Investigatory Project" on the topic "Drug Addiction" has been successfully completed by Dhananjay Dhiman of class XII - A under the guidance of Mrs. Download free. 15 Alcohol Sources: Ethyl alcohol, or ethanol, flammable, colorless liquid having a penetrating odour and burning taste. 4. The quantity of nicotine contained in one cigar may prove fatal if injected intravenously into a person. Milhorn, Jr., Chemical Dependence (1990); D. Smokers may develop a physiological craving for nicotine and then they cannot give up smoking. 13. Excitement and Adventure: The young take to drugs to satisfy their instinct for excitement and adventure. 7. Project Report on Heart/Heart Beat Project Report on Science and Technology Project Report on Fashion / Fashion Designing Project Report on Infrastructure of Indian Economy, Economic Development, Transport, Communication Facilities Development, Social and Economic Infrastructure Project Report on Our Environment Biology Project Report on Tools to Diagnose the Vital Capacity on Sports Boys and Girls Project Report on Vitamins / Sources of Vitamins Project Report on Transpiration of Plants Biology Project Report on Drugs Addiction Project Report on Useful Plants and Animals Project Report on Cells / Cell Structure Project Report on Enzymes Project Report on Biomagnifications / Bioconcentration, Project Report on Organic Farming / Organic Agriculture Project Report on Phylum Porifera Sample of Writing A Notice Sample of Writing A Informal Letter Sample of Writing A Formal Letter Sample of Writing A Formal Letter-Next 1. However, it would not have been possible without the kind support and help of many individuals. Its oxidation starts at once and a large amount of heat is produced. 13 Tobacco Sources: It is a native of South Africa, where the Red Indian first started smoking. Alcohol 15 12. A temporary escape from the life problems and mental relaxation felt on taking the drugs in the beginning increase person's interest in them. Any feeling of lift a person may claim to feel is a mistaken impression or an attempt to justify the act in his own mind. The desire for More Work: Students sometimes take drugs to keep awake the whole night to prepare for the examination. I am highly indebted to my Biology teacher. Mrs. Repeated use of certain drugs on a periodic or continuous basis may make the body dependence. A smoker should avoid smoking. Smoking may give some temporary relief to the strained nerves but in the long run, it proves a dangerous health hazard. Generally, the term drugs applied to any stimulating or depressing substance that can be habituating or addictive. Combination Effect 1. What is meant by a drug? 16. Tobacco smoke is drawn directly from the pipe and through water is hubble-bubble. Bibliography 17 14. Hence, no immediate ill effect is observed. The daily dose to get the desired effect increases with time. A drug may also be defined as a chemical which, when taken in some way after the body function. A person with a cigarette hanging from the mouth looks odd. Conclusion 17 13. When smoked only 10% of the smoke is inhaled. 12 Social Disease - Smoking, Drinking, and Use of Drugs Smoking and drinking and use of drugs frequently or regularly are social diseases. Family History: Children may take to drugs by seeing their elders in the family. My Whats App : +91-8398957646 My Email Id : bkm.7899@gmail.com Here are many Biology Projects download from Allprojectreports.com |, Biology Project Reports XII Class for CBSE. 8 INTRODUCTION TO "DRUGS ADDICTION" "Drug Addiction" phrase is made by two words: (I) Drug (II) Addiction. Social Disease - Smoking, Drinking, and Use of Drugs 12 10. 3. Sailaja Nayak, for her invaluable guidance which has sustained my efforts in all the stages of this project work. 14. 10. Opiate Narcotics Opium, Morphine, Codeine, Heroin Suppress brain activity relaxed pain. (iii) Smoking is annoying to others: Cigarette smoke is quite annoying to non-smokers. Combinations of Drugs and Alcohol 10 8. There are many factors that lead people to drug addiction. Bibliography See H. (ii) Smoking mars personality: Teeth may become stained. End of project 18 5. 11. Inhaling tobacco smoke from cigars, cigarettes, biddies, pipes and hubble-bubble is called smoking. High concentration of nicotine paralyzes nerve cells. Teacher-In-Charge External Examiner 3. 1 KENDRIYA VIDYALAYA, SVP NPA SHIVARAMPALLY, HYDERABAD - 500052 BIOLOGY INVESTIGATORY PROJECT DRUG ADDICTION SUBMITTED BY: Dhananjay Dhiman XII - A CBSE Roll No. - 2016-17 2. Alcoholics are found in all society section of society. 9. Introduction to "drugs addiction" 8 6. Alcohol + Barbiturates Markedly increased the depressant effect. A person who is habituated to a substance or a practice, especially a harmful one, is called an addict. Acknowledgements 3 3. Alcohol + Aspirin Increased changes of damage to gastric mucosa. In a piece of leaf. Is Alcohol A Stimulant? Aim/Objective 6 4. Since heat is not needed in the body, it is taken up by the blood and carried to the skin for dissipation. (iv) Increased blood pressure due to smoking chances the risk of heart diseases. (ii) Relaxes the muscles. I would like to thank my principal Dr. NSK Swamy and school for providing me with facilities required to do my project. Addition: Addiction to alcohol is called alcoholism. 2. Alcohol + Antihistamines Marked drowsiness 3. Rather the energy derived from food is used up in ridding the body of excess heat. As in other countries, the menace of drug addiction is spreading in India also. 15. Nicotine synthesis occurs in the roots of the plant but it is stored in the leaves. 8. Sailaja Nayak in particular fulfilment of the curriculum of Central Board of Secondary Education (CBSE) leading to the award of annual examination of the year 2016-17. How does drug addiction begin? Baum, Smoke and Mirrors: The War on Drugs and the Politics of Failure (1996); M. Tobacco 13 11. 1. The leaves contain 2 to 8% nicotine. The blood supply of internal organs is greatly reduced resulting in fall of temperature in them. Simultaneous use of drug and alcohol may produce dangerous effects, including death. It is the principal constituent and the intoxicating principle of wines. Type of Drug Examples Effect Sedatives and Tranquilizers Barbiturates, Benzodiazepines Depress CNS activity give a feeling of Calmness, relaxation, drowsiness. 18. Alcohol is quickly absorbed in the stomach and upper part of small intestine and reaches all the tissues in minutes. Which is beyond voluntary control. Jones, Hepcats, Narcos, and Pipe Dreams: A History of America's Romance with Illegal Drugs (1999); publications of the Drugs & Crime Data Center and Clearinghouse, the Bureau of Justice Statistics Clearinghouse, and the National Clearinghouse for Alcohol and Drug Information. Looking for a Different World: A wrong notion that the drugs open up a new world tempts some young octets to start taking-drugs. Friend's pressure: Frequent appreciation of drug experience by friends allures others to start the use of drugs. Meaning of Addiction Addiction is the habitual, psychological and physiological dependence on a substance or practice. Actually, alcohol is a depressant, a substance which dulls the senses. 11 How does drug addiction begin? Its main stimulating component is poisonous volatile alkaloid nicotine, which causes addiction. Lips may get discolored and breath becomes foul. It may prove even more harmful to them. 5 6. Alcohol + Marijuana or Hashish Decreased coordination increased reaction time Impaired judgment. I would also like to thank my parents for their continuous support and encouragement. When in the company of non-smokers. Other factors that make people take to these vices are the inability to face problems of life indifference shown by members of the family and encouragement or pressure by friends. (iii) Releases adrenaline, increasing heart beat rate and pressure. Relief from Pain: A prolonged use of pain-relieving drugs with physician's advice at times leads to addiction. Modes of Use: Alcohol is taken in low concentration, as the beer, toddy, and wine and in relatively high concentration as arrack, brandy, whiskey, rum, gin, vodka etc. Alcohol causes intoxication and thus, acts as a poison. They act on the brain and alter behavior, consciousness, and capacity of perception. The energy released by alcohol is not used in any life process. The drug is also known as a medicine. (v) Retards foetal growth in expecting mothers and (vi) Causes tobacco addiction. Bidi is tobacco wrapped. T. 6 Objective To study drugs, their classification, addictive nature, and prevention from addiction. Such drugs are called psychotropic drugs. By the time they realize that drinking is adversely affecting them, it is too late to give it up. 11 9. Other Harmful components of Tobacco Smoke: Besides the poisonous nicotine, the tobacco smoke contains carbon- monoxide, polycyclic aromatic hydrocarbons, and tar. 14 Effect of Nicotine: Nicotine is a low concentration. 3 Acknowledgements I have taken efforts in this project. 7. 6. Biology Projects : Biology Projects| Biology Project Report Topics, Biology Project Ideas, Biology Project experiments, Projects on Biology, Class IX, X, XI & XII Biology Project Reports, Biology Investigatory project reports, Biology Project Report Samples Biology Project Report on AIDS Biology Project Report on Common Cold Biology Project Report on Viral Diseases Biology Project Report on Sleeping Habits in Persons of Different Age Groups Project Report Petroleum Project Report Human Diseases Project Report Ebola Virus Biology Project Report on Malaria Project Report/Essay on Games / Sports, Games Play, Definition of Games, Advantages of Games, Asian Games Project Report Biology onMorphological Characters Flower Inflorescence and Leaves in Angiosperms Project Report Non conventional Sources of Energy Biology Project Report on Components of Food Biology Project Report on Dowry System Biology Project Report on Green House Effect Project Report on Importance of Trees Project Report on India's Monsoon Project Report on Malnutrition Biology Project Report on Manures and Chemical Fertilizers Project Report on Transport System Project Report on Pollution Biology Project Report on Water Pollution Biology Project Report on Land Pollution Biology Project Report on Air Pollution Biology Project Report on Noise Pollution Biology Project Report on Population Explosion and Control Project Report on Sources of Energy Project Report on Sun Project Report on Mars Project Report on Festivals of India Project Report on Terrorism Project Report on Planets Biology Project Report on Cancer Project Report on Education System in India Project Report on Indian Culture, Dresses, Foods, Festivals etc. Alcohol + Valium Dramatically increases sedative effect. Certificate 2 2. Soon they become habitual and find in difficult to leave. Hallucinogens LSQ, Mescaline, psilocybin, Ganja, Charas, Hashish. About 87.6 per cent drug addicts are between the ages of 14 and 25 years. My thanks and appreciations also go to my fellow classmates and the laboratory assistant in developing the project and to the people who have willingly helped me out with their abilities. A large number of our young men and women have taken to intoxicants. They adversely affect the health of the addicts and the society. Project Report on Drugs Dependence 7 5. A mixture of cocaine and heroin called speedball gives a spontaneous kick of cocaine and prolonged pleasure of heroin. Other Effects: (i) Smoking effects economy: A smoker not only waste money but also runs the risk of burns and fires. Some people start taking drugs without medical advice due to one reason or the other and become drugs dependent. Young people take to these habits for fun, show off or curiosity, as an adventure or feeling of freedom, or as a gesture of defiance against the elders who themselves indulge in these activities but check the youngsters. 17 Conclusions Drug use and addiction cause a lot of disease and disability in the world. 7 Project Report on Drugs Dependence Drugs are prescribed by physicians for the prevention or treatment of diseases, or for increasing the physical and mental performance and are withdrawn as soon as the desired effect is achieved. It has large, quote to lanceolate leaves and terminal clusters of tubular, white or pink flowers. Any substance, other than food, used in the prevention, diagnosis, all aviation or treatment of a disease is called a drug. Hence, they are also termed mood-altering drugs. It reduces the efficiency of every tissue the body. Frustration and Depression: Some people start taking drugs to get relief from frustration and depression. (i) Social pressure (ii) Desire for excitement (iii) Feeling of independence (iv) Liking of taste (v) Desire to escape from such realities of life as disappointments and failures and (vi) The desire to offset the hardships and monotony of daily life. When barbiturates and alcohol are taken together, each doubles the effect of the other. Since the receptors of heat are located in the skin, the rush of blood to the skin gives a false impression of warmth in the body. Massing, The Fix (1998); J. NCERT Class 12 Lab Manual Class 12 NCERT textbook Reference articles from various blogs. Why People Take to Drinking: The drinkers offer one or more of the following reasons for starting drinking. Now the tobacco plant has spread the world over. Recent advances in neuroscience may help improve policies to reduce the harm that the use of tobacco, alcohol and other psychoactive drugs impose on society. 4 Index S.No. Content Page No. 1. The cigar is a roll of tobacco leaf. Stimulants Amphetamines, Caffeine, Cocaine Make a person more wakeful, alert and active, cause excitement. 8.
